Giant May Flowering Tulip,
Rev. H. Eubank, 10c.

New May
Flowering
Tulip,
Europe
8c each.

In America the Darwin Tulips are becoming extremely popular and are now widely appreciated and they promise soon to exceed the favor they have enjoyed in Europe. The colors include most brilliant scarlet and crimson and many of the somber tones as well. The shades are rose and pink, of violet and purple, are unsurpassed in any other Tulips for their delicacy, for their richness of coloring. Added to their value because of the long-stemmed blooms they produce, the Darwin may be left undisturbed for two or three years for the borders among other hardy flowers. The color effects of this family of Tulips are unexcelled. They give us the easiest flower to grow and are absolutely sure to bloom. The bulbs we offer are of a first-class grade and should give most satisfactory results.

Giant May Flowering Tulip Reverend Eubank

A striking beautiful Darwin of soft lavender violet color with silver gray flush darkening the base. The blooms are of good size borne on long stems and are remarkably effective in coloring. There is little comparison between Tulips of its kind and the old earlier flowering varieties and when it is planted this beautiful variety will always be remembered. Price, 10c each, 3 for 25c, 6 for 45c, 85c per dozen, 25 or more at hundred rate.

The Black Tulip—"La Tulipe Noire"

"The Flower That Set a Nation Mad"

The largest amount of money ever offered for the production of a single flower was \$10,000, for a perfectly black Tulip, over three hundred years ago, during the Tulip craze in Holland. The romance of its production formed the plot for a noted novel; and it is also responsible for one of the greatest financial panics of the world. The descendants of this famous flower are still very scarce, rare and valuable. We have secured a few bulbs of this historical Tulip and offer you bulbs of the jet black, wonderful large flowered Tulip. There is yet no variety which surpasses this in either beauty or size. Price, 7c each, 3 for 18c, 6 for 31c, 12 for 54c.

The Black Tulip, La Tulipe Noire—7c, 54c per dozen.

Select Named Single Hyacinths

Single Hyacinths are much to be preferred to double ones. In double Hyacinths whereas the single flowers are doubled, they are much farther apart on the stem, and therefore do not form nearly so handsome a truss as the single varieties, where the trusses are much longer and fuller. We strongly advise the single instead of the double for both bedding and pot culture.

Prepared Fibre for Bulb Growing

This is something new in which to grow and flower bulbs during winter in bowls, jardineres, fern dishes, etc., without drainage. A splendid advantage for townspeople or city people who have difficulty in obtaining good potting soil.

Prepared Fibre is composed of excellent Holland peat, combined with other materials, such as charcoal, crushed oyster shells, etc., to keep it sweet. It does not dry out as quickly as soil nor sour if too much water is given. It is light, clean and nice to handle, and if used as directed will encourage healthy growth and perfection of bloom. By our own testing of this material we have found that the bulbs come into flower two weeks earlier when planted in fibre, and that the flowers are much larger. This is especially true of the four Hyacinths recommended for pot culture on the opposite page. As soon as the Hyacinth bud begins to show color bring the pot into a warm, sunny position and give an abundance of water.

An excellent medium in which to grow Hyacinths, Tulips, Narcissus, Crocus, Freesias, etc. Full directions sent with every package.

Price, 12 cents per quart, postpaid; 4 quarts for 40 cents, postpaid. By express, 4 quarts for 30 cents; 8 quarts for 50c.

NOTICE!

REGARDING BULBS—While we do not anticipate any unusual delay in the arrival of bulbs in this country, it is hardly likely that they will reach United States for delivery as early as they did before the war. As this catalog goes to press we have been advised that the bulbs are on the way. The fall planting period seems to be extending later each year and we do not expect our customers to be inconvenienced in the time of delivery of the bulbs even though they may be a week or two later than usual in reaching us. Customers may feel sure deliveries will be made at the earliest possible moment but if for any reason an order can not be filled at all customers will be notified at the time of receiving the order. If therefore, you do not hear from us you will know order is held awaiting arrival of all bulbs.

The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with fine full center and perfect symmetrical spread. THE PLUMED FERN Scholzeli

With the recent introductions of Ferns which have come from the original Boston type, there is no variety with heavier and more plummy fronds than in the improved variety Scholzeli. It is unique in foliage, quite different from all other varieties of the family, and stands in a class by itself. The plant makes a comparatively dwarf, compact growth, the fronds, while dense, firm and rigid, are still graceful as the illustration shows. The foliage is also of a darker green than the original Boston Fern. All in all, it forms an ideal plumed Fern, possessing all the merits of former introductions while having a distinctive character that makes it of especial value. Price, nice shapely plants, 24c; larger size, 50c.

Popular Decorative Plants

Lace Fern

One of Most Beautiful and Popular
Foliage Plants of the Century.

A Decorative Plant of Unusual Value.

(*Asparagus Plumosus*) — The family of Asparagus plants comprises a number of varieties. Some are climbers, some drooping or trailing, some erect and bushy. Many of them are highly prized for their beautiful and graceful foliage, and the two varieties which we list on this page are practically the most popular and valuable of all. The variety Plumosus (*Asparagus Plumosus Nansu*) is a tall, climbing, decorative plant and one of the rarest and of delicate beauty. Its bright green foliage is extremely fine and plume-like. The fronds grow from six to eight inches in width and when cut retain their color and shape for weeks. The plant may be grown as a pot plant, a bushy form or climbing. Florists grow the *Asparagus Plumosus* to give them rich green strings of foliage to be used similar to the popular Smilax. *Asparagus* possesses the advantage of being more graceful and its foliage finer than those of the most delicate Fern. As a house plant it will thrive under practically all conditions. The *Asparagus* likes a good rich soil and fairly warm temperature. The plant does best and carries the richest color of foliage when it is kept in a growing condition through a plentiful supply of nourishment. *Asparagus* is comparatively free from diseases, and with all its good qualities and practically no bad ones, it ranks as one of the first decorative plants to be had. Nice young strong growing plants, 20c each; 3 for 50c; per dozen, \$1.60. Larger plants, 35c; 3 for 88c; per doz., \$2.70. Extra strong plants, 50c; 3 for \$1.25; per doz., \$3.60.

J. K., Brooklyn, Ill.: "The Ferns you sent me are surely beauties and are doing very fine."

Asparagus Plumosus (Lace Fern)
Foliage of richest green, 20c, 35c 50c.

Feather Fern

Unsurpassed for Window Boxes or
Hanging Baskets. Foliage Graceful
and Drooping, Dense Glossy Green.

(*Asparagus Sprengerii*) — The *Asparagus Sprengerii* gives us a plant of the bushy and drooping form of the *Asparagus* family. The foliage is composed of dense, glossy green, graceful and drooping branches. The Feather Fern or *Asparagus Sprengerii* is probably of a hardier nature than the Plumosus, and subjects itself to wider usage. It is especially valuable for window box and hanging basket planting, for vases and as specimens when grown in pots or as tub plants. The Feather Fern or *Asparagus Sprengerii* gives us a more valuable house plant, being one of easy culture, the sprays growing four to five feet long, and when the foliage is used for cut flower work it retains its freshness for an unusual length of time. The Feather Fern is particularly free from troublesome insects or diseases, and in this has one advantage over the large family of decorative Ferns of the Boston Fern type. The plants are of rapid growth, succeeding well in ordinary rich soil, and there is every reason to believe that all plant growers can have the greatest success with them. Price, nice strong growing young plants, 20c each; 3 for 50c; \$1.50 per dozen. Strong plants, 35c each; 3 for 88c; per dozen \$2.70. Extra strong plants, 50c; 3 for \$1.25; per dozen, \$3.60.

F. C. S., Augusta, Ga., says: "The Ferns purchased of you last spring are wonderful, the admiration of all who see them."

Asparagus Sprengerii (Trailing Basket Fern), Sprays three to four feet long. 20c, 35c, 50c.

The Best All-Round Plant Grown

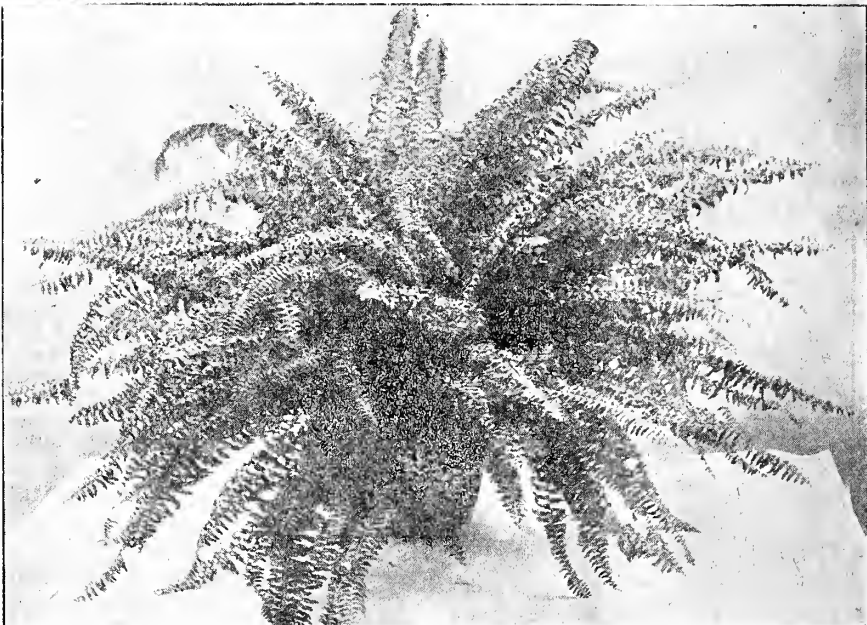

The Ideal Fern ROOSEVELT

A Notable and Valuable Novelty.
Wins Prizes Everywhere.

The popular Boston Fern has had the most phenomenal sale of any decorative plant that has ever grown. Fronds grow very broad and heavy, often measuring six inches or more across, and five or six feet long. Owing to the weight of the foliage, the plant assumes an exceedingly massive yet graceful appearance, and owing to the fullness of the fronds even small plants make much more symmetrical and beautiful plants than the popular Boston Fern. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly, overlapping each other and showing two shades of green, while the center and main part of the frond is rich dark green, the contrast producing a beautiful effect.

We offer well established plants at 24c each; 3 for 60c, postpaid; strong plants, 60c each.

Beautiful large flowering Pink Carnation Enchantress.

The Popular National Flower Fragrant Carnations

When the people throughout the country were vainly seeking for an appropriate flower, acceptable to all, as our National Emblem, nature opportunity came to their assistance by presenting the improved Carnation—the product of American soil—which seems especially created for that purpose, uniting the red and white flower with foliage of metallic hue. While it is generally conceded that the Rose ranks first for producing flowers for cutting, the Carnation is gaining in popularity for its profusion of bloom, easy culture, and for the exquisite fragrance of its flowers. The last few years have seen an entirely new Carnation, forming one of the most beautiful, and desirable flowers we have, flowering freely during the summer and fall in the garden, and with proper attention and care, giving an abundance of flowers indoors in the winter. NOTICE

United States Department of Agriculture is making an effort to eradicate that variety of Barberry that holds and transmits the destructive wheat rust. This rust comes from the old common Barberry which would be cataloged as *Barberris Vulgaris*. It is an upright growing plant with plain green foliage with yellow flowers with scarlet berries in the fall. The purple leaved variety or *Barberris Purpurea* is of similar habit of growth, generally not quite as tall and is also classed with the old common variety *Vulgaris* as being a variety to transmit the rust disease. We are, therefore, not offering or growing either variety. Let it be understood, however, that the most popular variety of all and now most widely planted, the variety *Thunbergii* is not classed as dangerous at all and may be purchased and planted without in any way opposing the Government's plans for the eradication of disease.
